BDA Swap procedure manual

This document is a summary of the swap procedure to convert from BDA(Waves) to BDA(ERC223).

■Preparation

◆ Provide Ether Wallet address for receiving BDA(ERC223)

・ We recommend a wallet address that you are using for airdrop(like MyEtherWallet).

・ We think there is no problem if you use a wallet that can receive a custom token of ERC20, we checked only MyEtherWallet.

・ The exchange's wallet address cannot be used.

・ This document explains the ERC address as 0xAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAA.

◆ Please check your Waves wallet address used for BDA

・ This document explains the Waves address as 3PBBBBBBBBBBBBBBBBBBBBBBBBBBBBBBBBBBB.
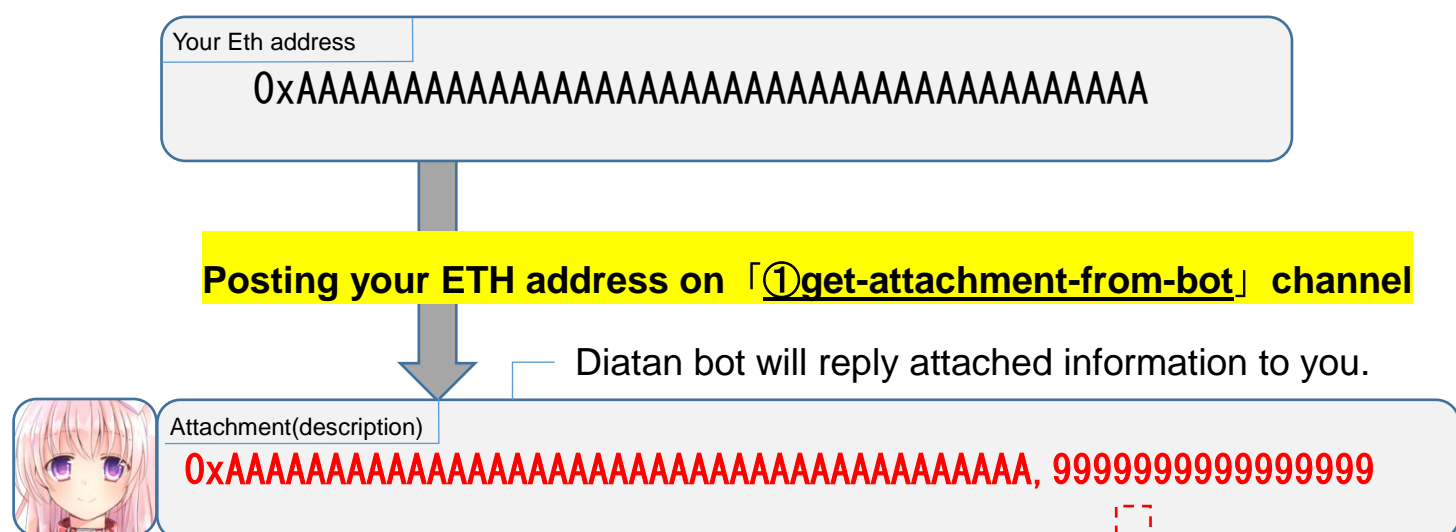

■Overview
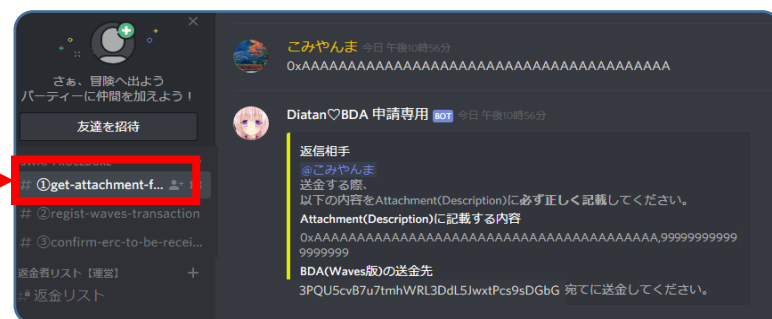

・As a procedure, you must send the BDA you have.

・You will be required to attach "attachment(description)" at the time of remittance.

・After sending BDA coin, please apply for registration. It will be completed if it is successfully registered.

# ■Registration procedure

◆Post your ETH wallet address

⇒ Posting place：「①get-attachment-from-bot」 channel

⇒ After posting your ETH wallet address on "①get-attachment-from-bot" channel, you can get "attachment(description)" from Diatan Bot.

Your Eth address
